

## Summary

### Senior front-end developer & user experience enthusiast

I use technology to solve **human problems**, empowering all types of people. Most recently at [Today Strategic Design](#), I supported [WorkSafe Victoria](#) in their mission to get workers home safely and helped [Our Watch](#) change the conversation around violence against women. I make **accessible, intuitive** interfaces that delight users. I've been using **JavaScript** frameworks like **Vue**, **Nuxt** and **React** to modernise the front ends of trusted CMSes like **WordPress** and **Drupal**. I enjoy engaging with the development community and **give talks** at meetups and conferences.

I'm looking for a role in a **diverse, multidisciplinary team** where I can support a **strong design vision** that's **driven by user needs**. I want to work in an environment where my team is **passionate** about our goals and where we feel **empowered** to make decisions.

## Technical Skills

- **Proficient:** HTML5, CSS3, ES6 JavaScript, Vue, Nuxt, React, Gatsby
- **Knowledgeable:** Webpack, PHP, Drupal 7 & 8, Wordpress, Twig, Node, Gulp, NPM, Git
- **Exposure:** Figma, Sketch, Photoshop, Vagrant, Docker

## Work Experience

### Senior Front-end Developer, Today Strategic Design [Nov/17—Jun/19] Melb. AU

- Led development of websites and apps at an ethical design agency
- Worked with government and non-profit clients to deliver best-in-class design and technical solutions
- Collaborated with design and content teams to define and prioritise development efforts
- Kept projects on track by coordinating development work of in-house developers and contractors
- Used modern JavaScript frontends with headless CMSes to create smart, extensible web presences
- Represented the agency as a speaker and attendee at meetups and conferences
- **Tools used:** HTML5, CSS3, JavaScript, Vue, Nuxt, Webpack, Drupal, WordPress, SilverStripe

### Front-end Developer, Tundra Interactive [Apr/16—Oct/17] Melbourne, Australia
